## TIMBER PROCESSING REPORT

For use by those corporations or individuals holding timber sale licences the competition for which was restricted to only Category 2 BC timber sales enterprises (Category 2 TSLs), and issued pursuant to section 20 of the *Forest Act*.

**This Report must be signed on Page 3 by a qualified professional.**

### NOTES ON METHOD

- **Volumes to include wood fibre obtained from all sources;**
- **Report all wood fibre volume consumed by the entire timber processing facility for the time period requested;**
- **Facility must be owned (or leased) by the Licensee, and support its registration as a BCTS enterprise (Category 2);**

Please read and complete Section 2 (following) before providing the data required in Section 1. The Section 2 worksheet provides the method for determining the data requested in Section 1. **The information must be provided for the time period requested.**

Name of Licensee:

Period of Time for which data is requested:  (mm/dd/yyyy) To

List all Category 2 TSLs held within two years before the first date above:

_____	_____
_____	_____
_____	_____

## Section 1.

**Box A** is the total volume of wood fibre consumed in the above noted time period through the timber processing facility owned or leased by the Licensee AND which supports that Licensee's registration as a BCTS Enterprise, Category 2.

**Please complete Section 2 before filling in Box "A" below.**

### Box A

Log Volume (m<sup>3</sup>)

## Section 2.

### Determining Wood Fibre Consumption Volumes

#### Step (1) Determining Volume Consumed using Inventory records:

$$\text{Usage} = [\text{Raw Material Inventory at Start of Period}] + [\text{Purchases for Period}] - [\text{Inventory at End of Period}]$$

This step provides a means to calculate the volume of wood products consumed during the time period stated in Page 1.

	Lumber & LVL (Mfbm)	Logs (m3)	MDF or Part. Board 5/8" count (M sq ft)	OSB 3/8" count (M sq ft)	Chips/sawdust (Tonnes)
Open Inventory	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Plus					
Purchases	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Minus					
Close Inventory	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Equals					
<b>Total Usage</b>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

If inventories are not available for all raw material wood products used, then the volume of purchases for the period is equal to the "usage" by the manufacturing facility.

#### Step (2) Conversion to Equivalent Volume of Logs

Convert the volumes of different forms of wood fibre consumed (Step 1 above) into the equivalent volume of logs.

# BCTS

BC Timber Sales

M3 Logs

<b>Line 1</b>	Total Mfbm of lumber used	<input type="text"/>	Divide by .240	<input type="text"/>
<b>Line 2</b>	Total M3 of logs used	<input type="text"/>	Multiply by 1.0	<input type="text"/>
<b>Line 3</b>	Total M sq ft. MDF 5/8"	<input type="text"/>	Multiply by 2.8	<input type="text"/>
<b>Line 4</b>	Total M sq ft. Part Bd 5/8"	<input type="text"/>	Multiply by 2.7	<input type="text"/>
<b>Line 5</b>	Total M sq ft. OSB 3/8"	<input type="text"/>	Multiply by 2.0	<input type="text"/>
<b>Line 6</b>	Total M sq ft. Plywood 1/2"	<input type="text"/>	Multiply by 2.5	<input type="text"/>
<b>Line 7</b>	Total M sq ft. Veneer 1/10"	<input type="text"/>	Multiply by .500	<input type="text"/>
<b>Line 8</b>	Chips / sawdust (tonnes)	<input type="text"/>	Multiply by 1.37	<input type="text"/>

Total Line 1 to Line 8 = Equivalent Log Volume = **Box (B)**

**Enter [Box B] in Section 1, Box A**
