READER'S GUIDE

ORDERING

Sections and headings are numbered progressively within chapters so that the order and relative importance can be determined by checking adjacent numbers. The system is based on the following order. Note not only the numbers but also whether the section or heading title is centered, capitalized or underlined.

1 FIRST ORDER (CHAPTER TITLES)

1.1 SECOND ORDER (SECTION TITLES)

1.1.1 THIRD ORDER (HEADING TITLES)

1.1.1.1 FOURTH ORDER (SUBHEADING TITLES)

Fifth Order

Sixth Order

Seventh Order

Eighth Order

1.1.1.2 SECOND SUBHEAD

1.1.1.3 THIRD SUBHEAD

1.1.2 SECOND HEADING

1.2 SECOND SECTION TITLE

TABLES, FIGURES AND MAPS

All tables, figures and maps are numbered and lettered consecutively within each chapter. Tables are ordered numerically, e.g. Table 1/1, Table 1/2, etc., with the first number representing the chapter and the second the table. Figures are listed alphabetically, e.g. Figure 1/A, Figure 1/B, etc. Maps are ordered with lower case letters, e.g. Map 1/a, Map 1/b, etc.

In almost every case, each table, figure or map will follow the reference to it in the text and will be found on either the same page or the following one.

REFERENCE LINES AT THE TOP OF PAGES

As a quick guide to the contents on any page, reference lines have been printed at the top of each page. For example:

British Columbia and Its Resources
1.1 Physiographic Regions - Canadian Cordillera

The chapter title is printed above the line (British Columbia and Its Resources). Immediately underneath, the chapter and section number are noted (1.1), along with the section title (Physiographic Regions). Usually there will be a hyphen, followed by the heading title (Canadian Cordillera).
