### Forest Cover Maps

- Forest cover maps follow the British Columbia Geographical System (BCGS) of mapping. The cartographic framework for this mapping is the Universal Transverse Mercator (UTM) coordinate system. This system is based on the North American Datum 1927 (NAD27) or the North American Datum 1983 (NAD83). Each mapsheet is precisely 12 minutes of longitude wide by 6 minutes of latitude high. ### The National Topographic System (NTS) Maps

- Topographic maps produced by Natural Resources Canada conform to the National Topographic System (NTS) of Canada. The National Topographic System provides general-purpose topographic map coverage of the entire Canadian landmass. These maps depict, in detail, ground relief, drainage, forest cover, administrative areas, populated areas, transportation routes and facilities, and cultural features. They are available in two standard scales, 1/50 000 and 1/250 000. To purchase this product or other lithographed maps of British Columbia, Please Contact:
