February 28, 2008

To: All Licensees in the Cascades Forest District

Dear Sir or Madam:

This letter is regarding a recent change to the Designation of Timber to authorized scale sites in the Southern Interior Forest Region. The attached letter from the Regional Executive Director states that effective immediately, timber with any valid timber mark may be transported to any authorized scale site within the Southern Interior Forest Region without first being officially designated through the use of a Mark Site Designation form as the Ministry has required in the past.

If you have any questions regarding this new procedure or the attached letter please call me directly at (250) 378-8485.

Yours truly,

Ray Lang
District Scaling Supervisor
Cascades Forest District
