

Recreation Evaluation – Post Data Collection Questionnaire

The following questions are intended to help focus our post recreation evaluation assessment. Please answer the following questions and bring your completed questionnaire to our workshop on November 15 and 16. We will discuss the answers to each question as a group. Changes to the evaluation form will be based, in large part, on the answers to the questions below. The form should take no more than 15 minutes to complete. Thanks.

Question 1: The data was operationally practical to collect (the amount of time it took, types of data etc.)

1 strongly agree 2 agree 3 neither agree or disagree 4 disagree 5 strongly disagree

Comments:

Question 2: The format and layout of the evaluation form was practical.

1 strongly agree 2 agree 3 neither agree or disagree 4 disagree 5 strongly disagree

Comments:

Question 3: Analysis of the data will provide the information needed to improve recreation site management in your region.

1 strongly agree 2 agree 3 neither agree or disagree 4 disagree 5 strongly disagree

Comments:

Question 4: Analysis of the data will provide an appropriate basis for helping better define recreation site and facility standards.

1
strongly agree

2
agree

3
neither agree or disagree

4
disagree

5
strongly disagree

Comments:

Question 5: I was adequately prepared (trained and/or provided with enough guidance) to collect the data.

1
strongly agree

2
agree

3
neither agree or disagree

4
disagree

5
strongly disagree

Comments:

Question 6: Collecting this data was a good use of my skills and time.

1
strongly agree

2
agree

3
neither agree or disagree

4
disagree

5
strongly disagree

Comments:

Question 7: I would recommend that this type of monitoring continue in order to build up data on status and trends.

1
strongly agree

2
agree

3
neither agree or disagree

4
disagree

5
strongly disagree

Comments:

Question 8: How long would it take under normal conditions to complete this evaluation for a site with <20 vehicle units?

Question 9: How long would it take under normal conditions to complete this evaluation for a site with >20 vehicle units?

Question 10: Is there any data on the forms that you would recommend we do not continue to collect?

Question 11: Are there additional data attributes that you would like to see collected?

Question 15: Should we use this evaluation to determine if particular recreation sites should be closed? Yes No

Comments:

Question 16: Do you feel this evaluation will adequately represent a measurement of the “publics” expectations and satisfaction? Yes No

Comments:

Question 17: Will the information collected be adequate to inform and support the linkages between the recreation, engineering and C&E programs?
Yes No

Comments:

Question 18: What information from the evaluation should be put into the FTA and/or FRMA data systems?

Question 19: What strategy (and key decisions) would you recommend be taken to implement this evaluation more broadly across the province?
