

Forest Investment Council Recommendations

February 14, 2003 Meeting

Council's recommendations on whether FIA funding should be used to reimburse licensees for costs incurred in timber supply analyses:

- FIA funding should be used to reimburse licensees for timber supply analysis for a period of one year or until the timber pricing system fully reflects whatever costs licensees will incur in doing timber supply analyses.
- Funding should be taken "off the top" of the entire Forest Investment Vote for this purpose.

Council members agreed to re-convene by conference call to discuss potential FIA funding for forest health on Friday, February 21, 2003.
