Working Plan for Sx90119V Fd Seed Orchard Seedling Trial

1. Objectives

To compare the early field performance (survival and growth) of two Fd seedlots. S/L 6291 is 'Al' seed (seed orchard - controlled cross) while S/L 1292 is 'B3' seed (wild collection).

2. Location

La Page Road, Duncan Forest District, Opening #92B071-13

3. Trail Stock

<table>
<thead>
<tr>
<th>SEEDLOT</th>
<th>STOCK TYPE</th>
<th>NURSERY</th>
</tr>
</thead>
<tbody>
<tr>
<td>6291</td>
<td>1+0 PSB 313 B</td>
<td>Pelton</td>
</tr>
<tr>
<td>1292</td>
<td>1+0 PSB 313 B</td>
<td>Pelton</td>
</tr>
</tbody>
</table>

4. Trial Design

One (1) replication (plot) of one hundred (100) trees of each seed lot in alternating rows.

5. Dates of Planting and Assessment

Planted March 1990
Assess survival and total height Fall 1991, Fall 1995, Fall 2000.

6. Reports

7. Report Distribution

R.O. Silviculture, Duncan Forest District
Silviculture Officer, Vancouver Region
C. Von Hahn, Silviculture Branch
J. Woods, Mesachie Lake Research Station
