Skidder settings Corrigan Creek,
Compartment 182.
Photo by Photographic Survey.
Looking east to northeast from Bugaboo (Mt. 9). This picture shows timbered hill tops which are characteristic of the Hemlock Belt.

Photo by Photographic Survey.

Looking east to southeast across Alberni Canal.

Photo by Photographic Survey.
Looking north across the San Juan Valley up Harris Creek and Lens Creek. This photo illustrates the steep and often rocky terrain typical in Douglas fir types.

Photo by Photographic Survey.

Northwest across the lower end of Hinchin Lake. The timber in this picture is chiefly Hemlock-Cedar and Hemlock-Balsam. Note the belt of flat, poorly drained, timber land along the coast at the extreme left.
