Citation:

Meidinger, D. 1987. Recommended vernacular names for common plants of British Columbia. B.C. Min. For. and Lands, Research Report RR87002-HQ.

The contents of this report may not be cited in whole or in part without the approval of the Director of Research, B.C. Ministry of Forests and Lands, Victoria.

PREFACE

The main objective of this publication is to recommend common names for the indicator plants used in Ecology Programme publications. For some species, there are many common names — for others, there may be only one or even none in “common” usage. For species with many vernacular names, the choice of any one name is often arbitrary, however, I tried to choose the name that is most commonly used in floras and plant guides relevant to British Columbia. For species with no real “common” name, I used whatever I could find or whatever has been suggested to users of the Ecosystem Classification system at Ministry training courses.

This list does not present common names for all plant species in British Columbia, but only for those that: 1) have “indicator” value; 2) are not rare or localized in distribution; and, 3) could be useful in ecosystem identification as they do not require a compound microscope or specialized chemicals for identification (as do most mosses, lichens and liverworts). The term “indicator” has a very broad and varied usage, but for this publication it generally refers to plants that are general to specific indicators of climate, soil moisture and soil nutrient regime, or successional development

. Scientific names (latin names) are from the following sources:

Crum, H.A., W.C. Steere and L.E. Anderson. 1973. A new list of mosses of North America north of Mexico. *The Bryologist* 73:499-543.

Hale, M.E. Jr. and W.L. Culberson. 1970. A fourth checklist of the lichens of the continental United States and Canada. *The Bryologist* 73:499-543.

Stottler, R. and B. Crandall-Stottler. 1977. A checklist of the liverworts and hornworts of North America. *The Bryologist* 80:405-428.

Taylor, R.L. and B. MacBryde. 1977. Vascular plants of British Columbia: a descriptive resource inventory. The University of British Columbia Press, Vancouver, B.C.

For vascular plants not found in Taylor and MacBryde (1977), scientific nomenclature follows:

Kartesz, J.T. and R. Kartesz. 1980. A synonymized checklist of the vascular flora of the United States, Canada, and Greenland. Volume II. The biota of North America. The University of North Carolina Press. Chapel Hill, North Carolina, U.S.A. 498 p.

In addition to Taylor and MacBryde (1977), the following references were used for determining common names:

Clark, L.J. 1973. Wild flowers of British Columbia. Gray's Publishing Ltd. Sidney, B.C., Canada. 591 p.

Douglas, G.W. 1982. The sunflower family (Asteraceae) of British Columbia. Volume I - Senecioneae. Province of British Columbia, Ministry of the Provincial Secretary and Government Services. Victoria, B.C. Occasional Papers of the British Columbia Provincial Museum No. 23. 180 p.

Harthill, M.P. and I. O'Connor. 1975. Common mosses of the Pacific coast. Naturegraph Publishers, Inc. Healdsburg, Calif. U.S.A. 119 p.

Hitchcock, C.L. and A. Cronquist. 1973. Flora of the Pacific Northwest. An illustrated manual. University of Washington Press. Seattle, Wash., U.S.A. 730 p.

Lyons, C.P. 1974. Trees, shrubs and flowers to know in British Columbia. J.M. Dent and Sons Ltd. 194 p.

Moss, E.H. 1974. Flora of Alberta. University of Toronto Press, Toronto, Ontario. 546 p.

Pojar, J., R. Love, D. Meidinger and R. Scagel. 1982. Some common plants of the Sub-Boreal Spruce Zone. Province of British Columbia Ministry of Forests. Victoria, B.C. Land Management Handbook No. 6. 102 p.

Porsild, A.E. 1974. Rocky Mountain wildflowers. National Museums of Canada, Ottawa, Ontario. Natural History Series, No. 2. 454 p.

Scoggan, H.J. 1978/79. The flora of Canada. Parts 2-4. National Museums of Canada, Ottawa, Ontario. Publications in Botany No. 17(2-4).

Welsh, S.L. 1974. Anderson's flora of Alaska and adjacent parts of Canada. Brigham Young University Press. Provo, Utah. 724 p.

ACKNOWLEDGEMENTS

I would like to thank the many individuals that helped me with the list — their encouragement and valuable comments were greatly appreciated. My Forest Service colleagues — Ray Coupe and Anna Roberts (Williams Lake), Jim Pojar (Smithers), Fraser Russell (Kamloops), and Bob Green (Vancouver) — all were very helpful. Ted Lea (Victoria), Gail Ross (Chilliwack) and especially Bill Merilees (North Vancouver) of the Ministry of Environment and Parks all provided useful comments. George Douglas was also very helpful in the comments he offered. Carmen Cadrin and Tracy Fleming assisted in producing the earlier versions of this list. Linda Fraser, Louise Gronmyr and Jean Stringer typed the manuscript, and the typesetting was done by Beth Collins.
