

RSM Riparian/SLBD Training Schedule, April – May, 2006

This training schedule is the latest update (May 25, 2006) “FULL” training sessions for each of the 3 regions for April, May and June. The dates and places are set but the trainers may change slightly. There will be other training sessions later in the field season (Mentor and refresher training).

Each training session will begin on the Tuesday at 8:30 am in the district office or some other office as arranged by the district contact. This gives Monday as a travel day for staff to get to the session and gives trainers the day to make sure everything is ready and to view the training site. The stand level biodiversity checklist will be trained on the Tuesday for each session. The riparian checklist will be trained on the Wednesday, Thursday and part of Friday for each session. Each session is a “FULL” session. Staff that feel they only need a refresher can determine how long they need to stay at these sessions to get up to speed on the revised checklists and procedures. Trainers will be contacting district contacts to make arrangements for training within their district.
