

# Maps

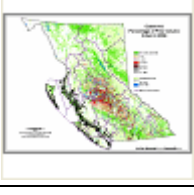

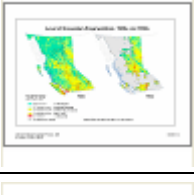

The maps used to illustrate the indicators are listed below, showing availability in one or more of three formats:

1. PDF (for printing from the State of British Columbia's Forests website)
2. HTML (for viewing on State of British Columbia's Forests website)
3. Interactive HTML (on the [BC Forest Information](#) website)

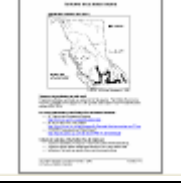

The interactive maps include a zoom function. Several layers can be turned on to show cities and towns, highways, protected areas, private land, agricultural areas and other features. A few layers also have pop-up text for the names of features such as protected areas and ecosections.
