Re: RESULTS Information Submission Specifications – Licensee Submissions

I am pleased to announce the publication of the *RESULTS Information Submission Specifications – Licensee Submissions* (RISS-ls). This publication has been available since 2006 as a Draft under the previous title: *Silviculture Information Submission Guide*.

The Minister has delegated to me the authority to specify form and manner of silviculture reporting under the *Forest Planning and Practices Regulation* (FPPR) s. 86(6), and the requirements for forest cover inventory under FPPR s. 1. These specifications and requirements are outlined in the RISS-ls.

The original Draft document was subject to a lengthy review process by Branch, Regional and District MFR Staff, Legal Services, COFI, CFPA, Licensees, Service Providers, Data Software Providers and Consultants. Reviewer comments were considered based on the current structure and functionality of RESULTS database and as such have been incorporated into the third revision.

RESULTS users are invited to provide on-going feedback that can be addressed with periodic revisions of this document held concurrently with RESULTS release schedule.

Please direct RESULTS questions and on-going feedback about this publication to Caroline MacLeod (250-356-2094; Caroline.MacLeod@gov.bc.ca).

Jim Snetsinger
Chief Forester
