

What's New for Version 2.02.01 - April 2005

Colour Legend

Indicates changes applicable to the Coast and interior;

Indicates changes applicable to the Coast only;

Indicates changes applicable to the Interior only;

1) Addition of Registered Forest Technician (RFT) (Coast and Interior)

Allow RFT to have the same role and security as RPF's (update and submit).

2) Enhancements to "Comments" Usage (Coast and Interior)

- Allow unlimited number of characters for comments at any time during the workflow process.
- To activate a comment:
 - **LICENSEE/BCTS** - proceed to the Acknowledgements screen and select the COMMENT button
 - **MOF reviewers** - proceed to the Control screen and select the COMMENT button.
- All comments are cumulative until the status of the appraisal changes.
- Comments are integrated into the auto-emails and tracked in audit history.

3) A new ECAS status called, Entered in Error (EE) (Coast and Interior) (Administrator only function via ECAS Help Desk).

The new status would be helpful in cases where an appraisal that has gone through MOF which is no longer needed.

4) New Recall workflow buttons for Ministry (Coast and Interior)

Used only by MOF review staffs in such cases as when an appraisal has been sent for "clarification" to licensee and subsequently is pulled back by MOF to continue with the appraisal processing.

5) Change the field label to Total Net Coniferous Cruise Volume on the Interior Tree to Truck screen (Interior only)

6) Correction to mandatory splats on Attachment Screens (Coast and Interior)

Splats now identify the required minimum attachments for a Coast and interior appraisal.

7) Additional Audit Information on Audit History Screen (Coast and Interior) – historically, modifications to data within a table format were not adequately tracked. The new functionality will track detailed changes to the appraisal.

8) Change default for the MVI Eligible Indicator radio button settings to Yes on Control Screens (Coast and Interior) if it meets file type criteria.

- 9) **Effective April 1, 2005 Coast Old Growth is $\geq 95\%$ instead of $\geq 80\%$
(Coast only)**
- 10) **Removal of a default for the Sale Type field on BCTS (Coast only)**
- 11) **Re-label of Small Log and Hemlock on Interior Cruise /TTT (Interior only)**
- 12) **Correction to the Variable Cost functionality on BCTS for Interior (Interior only)**
