

## **NSA and NSARPT release to Production**

1. Tutorial 'How-to' videos – added under Help key:
  - a) To Search for Surplus seedlings
  - b) To Enter Surplus seedlings acceptance
  - c) To Build contract for seedling purchase or sales
  - d) To create Purchase or Sale contract
  - e) To declare Surplus or Deficit seedlings
  - f) To complete Overrun Approvals
  - g) To run and select criteria for NSA Reports
  
2. Stock Movement reports
  - fix to correct seedlot selection
  - fix to make the reports run much more efficiently and quickly
  
3. NSA350 Surplus
  - add Build contract button to move data from accepted surplus screen to new contract screen; available to Nursery Services, TSO update users.
  - when LFP surplus seedlings are purchased, that purchase is split off from the original request key with a P1 suffix, BCT funding and new accepting agency; exclude purchased stock from nursery rating
  
4. NSA352 Purchase/Sale – default seller to agency
  - ensure report/contract is printed correctly with Surplus comment, correct taxes
  
5. Client search – on many forms; updated so search works consistently across the system
  
6. Decimal places – format number fields (inventory, etc) to accept three decimal places on about 20 forms
  
7. NSA203 Request Key Maintenance: add flag to exclude key from Rating system, along with 'exclude' comment, userid
  - add tender number under Sowing tab
  - remove mandatory field of Projected Planting Date
  
8. Reports
  - Inventory NSA001, 010, 011 fixed so when Agency and Accepting Agency are the same, requests for both will be on the same report
  - Inventory NSA003 – comments field added
  - new Inventory NSA139 report with BGC and seedzone
  - Storage NSA049 – updated fields and sorts
  - Storage flow NSA138 with new sort
