Re: Cruising Requirement for Woodlot Licences on Tabular Rates

Commencing December 1, 2008 woodlot licence cutting authorities that are being appraised using tabular stumpage rates as per section 7.2(1) of the Coast Appraisal Manual (CAM), do not require cruise information to determine the stumpage rate.

Therefore, as per section 9.1.2 of the Cruising Manual, I hereby exempt the holders of woodlot licences from the requirement to cruise cutting authorities that are being appraised under section 7.2(1) of the CAM.

Jim Gowriluk
Regional Executive Director
Coast Forest Region
