Fire camp	Okanagan Complex Fire Camp
Incident overview	32 hectares in size (estimated) 65 personnel on site (52 BCWS and 13 contract). Air support, as required. 9 helicopters are assigned to the complex. This wildfire is classified as out of control
Weather forecast	Today: Mainly sunny MAX TEMP: 29° to 34° MIN RH: 15% to 25% WINDS: N-NW 10-20 km/h CHANCE OF LIGHTNING / DRY LIGHTNING low Poor overnight recoveries 40-60%
Fire behaviour prediction	Anticipate very similar fire behaviour compared to yesterday. Expect fire spread to be slope driven unless terrain is less than 30% slope. Fire spread <u>caused by winds</u> will generally be in a southerly direction. The Garnet valley is currently getting lighter winds than those that occur in the main Okanagan valley. This is expected to continue.
Challenges	Direct sun exposure and little to no shade makes the working conditions on this wildfire tough for crews.
Yesterday's achievements	Progress has been made on the south end of this wildfire. The fire is on steep slopes and crews are working their way up to the crest of the hillside.
Today's objectives	Air operations are planned to occur on this fire before crews arrive in order to assist crews with their suppression efforts. Today, crews will continue to extinguish hot spots.
<p>Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.</p> <p>Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.</p> <p>Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.</p> <p>Out: The fire has been extinguished.</p>
