| The following information is current as of | July 30, 2018 |
| Incident name and number | Mount Eneas (K51264) |
| Incident Commander | Glen Burgess |
| Contact information | Information Officer: Noelle Kekula Phone: 250 319-4815 Email: noelle.kekula@gov.bc.ca Hours: 8:00 a.m. – 8:00 p.m. only Media Contact: Marla Catherall Email: marla.catherall@gov.bc.ca Phone: 250 819-4191 Hours: 8:00 a.m. – 8:00 p.m. only |
| Fire camp | Okanagan Complex Fire Camp |
| Incident overview | 1793 hectares in size (estimated). 63 personnel and 2 pieces of heavy equipment are on site today. Air support, as required. 6 helicopters are assigned to the complex. Ministry of Transportation and Infrastructure contractors will be danger tree assessing and falling along the Hwy 97 corridor between Peachland and Summerland. This wildfire is classified as under control. |
| Weather forecast | Winds with thermal troughing in the area will be light and southeasterly as the normal southerlies set in. Temperatures will be a degree or two cooler today and will be in the low 30 degree range. Winds will be southerly and gusting up to 40 km/h near Kelowna and 10-20 km/h elsewhere. |
| Fire behaviour prediction | Anticipate very similar fire behaviour potential compared to yesterday, it may just be focused in another spot. Expect fire spread to be slope-driven, unless terrain is less than 30% slope. |
| Challenges | The high temperatures and tough terrain continue to challenge ground crews. Temperatures on site yesterday reached 42 degrees Celsius (approximately 108 degrees Fahrenheit). |
| Yesterday's achievements | Crews evaluated the results of the heat scan and extinguished hot spots. In addition, crews started demobilizing fire equipment on certain parts of the fire, where required. |
| Today's objectives | Ground crews will continue to patrol this wildfire and mop up (extinguish hot spots). |
| <p>Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.</p> <p>Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.</p> <p>Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.</p> <p>Out: The fire has been extinguished.</p> | |
