

The following information is current as of	July 30, 2018
Incident name and number	Glenfir (K51256)
Incident Commander	Glen Burgess
Contact information	Information Officer: Noelle Kekula Phone: 250-319-4815 Email: noelle.kekula@gov.bc.ca Hours: 8:00 a.m. – 8:00 p.m. only Media Contact: Marla Catherall Email: marla.catherall@gov.bc.ca Phone: 250 819-4191 Hours: 8:00 a.m. – 8:00 p.m. only
Fire camp	Okanagan Complex Fire Camp
Incident overview	Estimated at 100 hectares in size. This wildfire has increased in size. The majority of growth is in the park and no values are at risk at this time. A new perimeter map has been uploaded to reflect the change in size. 38 BCWS personnel on site. Air support, as required. 6 helicopters are assigned to the complex. This wildfire is now classified as being held. *The increased activity and smoke yesterday was from the Frederick Creek wildfire, which is near Glenfir.
Weather forecast	Winds with thermal troughing in the area will be light and southeasterly as the normal southerlies set in. Temperatures will be a degree or two cooler today and will be in the low 30 degree range. Winds will be southerly and gusting up to 40 km/h near Kelowna and 10-20 km/h elsewhere.
Fire behaviour prediction	Anticipate very similar fire behaviour potential compared to yesterday, it may just be focused in another spot. Expect fire spread to be slope-driven, unless terrain is less than 30% slope. The fires on the east side may see slightly stronger winds due to exposure. This wildfire in particular is somewhat protected from northerly winds; however, a southerly shift will cause some movement.
Challenges	Firefighters are working on steep rocky slopes in high temperatures with little to no shade. These difficult circumstances make traveling by foot slow for ground crews. Temperatures on site yesterday reached 42 degrees Celsius (approximately 108 degrees Fahrenheit).
Yesterday's achievements	Crews worked at strengthening containment lines to secure the upper gullies in order to extinguish hot spots.
Today's objectives	Firefighters reinforced existing hose lay so that they could extinguish hot spots further into the hard to reach gullies.
<p>Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.</p> <p>Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.</p> <p>Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.</p> <p>Out: The fire has been extinguished.</p>
