

The following information is current as of	Aug 1, 2018
Incident name and number	Goode's Creek (K51242)
Incident Commander	Reg Trapp
Contact information	Information Officer: Marla Catherall Email: marla.catherall@gov.bc.ca Phone: 250 819-4191 Hours: 8:00 a.m. – 8:00 p.m. only
Fire camp	Okanagan Complex Fire Camp
Incident overview	Currently estimated at 1370 hectares in size. There are 25 personnel on site today. 6 helicopters are assigned to the complex. This fire is classified as out of control.
Weather forecast	A strong upper ridge will continue to provide hot and sunny conditions. With the air mass becoming slightly unstable, there is a slight risk (20%) of an afternoon thunderstorm. Southerly winds will gust up to 40 km/h near Kelowna and 10-20 km/h elsewhere. Temperatures are predicted to range between 32- 37 degrees today.
Fire behaviour prediction	We will see winds remain light over the next few days and temperatures will decrease. However, with instability in the forecast, be prepared for some gusty conditions at times.
Challenges	Ground crews continue to work in extreme temperatures with no shade. The steep and rocky terrain is proving to add an element of difficulty, which makes traveling by foot a slow and tedious process.
Yesterday's achievements	Ground crews made great progress on this fire by the containment that was established on a large area of this fire.
Today's objectives	Crews will continue extinguishing any hot spots that they discover while patrolling.
Other	The Okanagan Complex is transitioning to a new incident management team. New contact information for the new fire information officers will be posted on the BC Wildfire Service wildfires of note webpage once the changeover occurs. Please be advised that even though fires within the complex seem inactive, resources are being downsized and some fire equipment is getting demobilized, these fires will still produce smoke. The perimeters of these wildfires are being mopped-up (extinguished) and any smoke that does appear will be from fuels burning well within the middle. This smoke is anticipated.
<p>Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.</p> <p>Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.</p> <p>Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.</p> <p>Out: The fire has been extinguished.</p>
