

Narcosli Creek (C12302)

The following information is current as of	August 19, 2018
Incident name and number	Narcosli Creek (C12302)
Incident Commander	Reg Trapp
Contact information	<p>Information Officers:</p> <p>Rosalie MacAulay Email: Rosalie.MacAulay@gov.bc.ca Phone: 250 713-8522</p> <p>Ellie Dupont Email: Ellie.Dupont@gov.bc.ca Phone: 250 713-1846 Hours: 8:00 a.m. – 8:00 p.m. only</p>
Fire camp	Yes
Incident overview	<p>3400 hectares in size (estimated) 41 personnel on site 10 helicopters are assigned to the complex. Air support, as required. 22 pieces of heavy equipment</p> <p>This wildfire is classified as 50% Contained</p>
Weather forecast	<p>TODAY: Mainly sunny. Smoky. Winds north to northeast 10 to 17 km/h. Gusts to 25 km/h. Min RH near 23%. High near 25</p> <p>Outlook for Monday & Tuesday: A strong upper ridge will give mainly sunny skies and warmer temperatures to the fire. Highs in the mid to upper twenties. Min rh's in the teens and 20's. Light and variable winds, briefly gusty in the afternoons.</p>
Fire behaviour prediction	Fire activity will have the potential to challenge control lines; don't let your guard down. Be aware of gusty winds and the effect on fire behaviour, if only for a short time. The slash blocks have more fuel loading than the standard slash fuel type, expect higher intensity. This higher intensity can cause fire whirls to develop, this would cause rapid fire growth and increased spotting potential.
Challenges	Unstable rock and awareness of power line
Yesterday's achievements	Establish containment lines, mop up to 50 feet of perimeter, and utilize burning to clean up the perimeter edge; when conditions allow.
Today's objectives	Patrol and mop up to 50 feet of perimeter line. Burn out fuels where possible.

Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.

Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.

Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.

Out: The fire has been extinguished.
