

The following information is current as of	August 02, 2018
Incident name and number	Goode's Creek (K51242)
Incident Commander	Reg Trapp
Contact information	Information Officer: Marla Catherall Email: marla.catherall@gov.bc.ca Phone: 250 819-4191 Hours: 8:00 a.m. – 8:00 p.m. only
Fire camp	Okanagan Complex Fire Camp
Incident overview	Currently estimated at 1370 hectares in size. There are 32 personnel on site today. 6 helicopters are assigned to the complex. This fire is classified as out of control.
Weather forecast	A weak upper ridge persists over the area. There will be a mix of sun and cloud today, with temperatures ranging between 28-33 degrees. Be advised that there is a risk of an afternoon thundershower this afternoon. Gusty winds will be present Thursday and Friday, with local afternoon gusts today reaching 35 km/h.
Fire behaviour prediction	Winds will be a bit higher today than they have been the last few days. Temperatures will be cooler; however, due to the increase in winds, there will be potential for elevated fire behaviour.
Challenges	Ground crews continue to work in extreme temperatures with no shade. Crews are also dealing with rattlesnake pits that are concealed in the steep and rocky terrain.
Yesterday's achievements	Firefighters had a successful day yesterday patrolling and extinguishing hot spots.
Today's objectives	Crews will continue the same objectives as yesterday by focusing their efforts on patrolling and extinguishing hot spots. Some fire equipment will be demobilized where it is no longer needed.
Other	The Okanagan Complex is transitioning to a new incident management team. New contact information for the new fire information officers will be posted on the BC Wildfire Service wildfires of note webpage once the changeover occurs. Please be advised that even though wildfires within the complex seem to be inactive as resources are being downsized and equipment is getting demobilized, these fires will still produce smoke. The perimeters of these wildfires are being mopped-up (extinguished) and any smoke that does appear will be from fuels burning well within the middle. This smoke is anticipated.
<p>Out of Control: Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is not being contained.</p> <p>Being Held: indicated that (with the resources currently committed to the fire) sufficient suppression action has been taken that the fire is not likely to spread beyond existing or predetermined boundaries under the prevailing and forecasted conditions.</p> <p>Under Control: The fire has received sufficient suppression action to ensure no further spread of the fire.</p> <p>Out: The fire has been extinguished.</p>
