

WILDFIRE UPDATE

Placer Mountain Fire (K61241)

Location: Approx. 37 km south of Princeton.

Date of Discovery: July 17, 2018

Fire Size: 2,336 hectares

Status: Out of Control

Cause: Lightning

Resources: 77 firefighters, 9 helicopters, 3 water tenders and 9 pieces of heavy equipment. Resources are being shared with the Snowy Mountain Fire.

Objectives: Crews have made excellent progress, with the fire now being 50% contained. Crews continue to construct guard along the south flank, and will conduct burn-offs if possible and if safe on the south flank of the fire. On the west flank, crews have tied the fire perimeter into an existing burn scar from a former wildfire. Crews continue to mop-up 100 feet within the perimeter.

Structural Protection (SPU): A structural protection specialist team has finalized the Cathedral Lakes Lodge structural protection plan as and installed sprinklers and pumps.

Snowy Mountain Fire (K51238)

Location: Approx. 14 km south of Keremeos

Date of Discovery: July 17, 2018

Fire Size: 6,594 hectares—will increase today once mapping is conducted of the overnight and early morning growth

Status: Out of Control

Cause: Lightning

Resources: 60 firefighters, 3 helicopters and 2 pieces of heavy equipment. Additional helicopters are being shared from the Placer Mountain Fire, and airtankers will assist today to reinforce containment lines at the valley bottom on the east flank (the area adjacent to the Lower Similkameen Indian Band).

Objectives: Crews worked overnight on the east flank, where they saw continued fire activity. With high downslope winds, the fire spotted across the Similkameen River south of Cawston which was responded to by 25 BCWS firefighters in conjunction with the Keremeos Fire Department. Unexpected cold front activity sustained fire growth overnight, and on the south side there are northerly winds at 25 km/hr pushing the fire south. The objective for today is to strategically place crews in the operable terrain areas, where they will continue to conduct burn-offs on the southeast flank as safe conditions allow. Structural protection specialists will continue assessing and equipping properties as needed on the east flank, working south down Chopaka Road.

WILDFIRE UPDATE

Remember that a Campfire Prohibition is in place throughout the Kamloops Fire Centre.
 For more information go to: <http://bcfireinfo.for.gov.bc.ca/hprScripts/WildfireNews/Bans.asp>

To report a Wildfire call: 1-800-663-5555 or *5555 on your cell

To call in a violation of the prohibition (if you do not consider the violation an immediate threat) you can call:

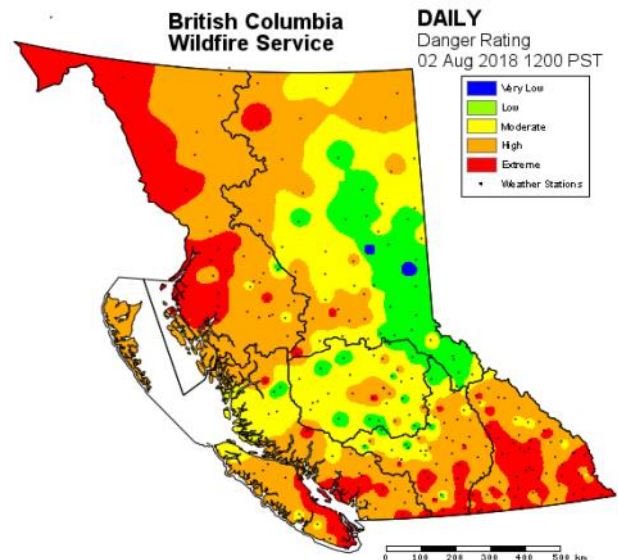

Report all Poachers and Polluters (RAPP) at 1-877-952-7277 or #7277.

Fire Weather

Hot, dry trend continues, possible isolated thundershower and slightly cooler temperatures overall.

Friday: temperatures expected to be low to mid 20s, with RH 25%. There is a chance of showers forecast for the day, with winds coming from the north and from the west up to 20 km/hr.

Looking ahead: the week ahead may hold some cooler temperatures and rain showers through the weekend, with a mix of sun and clouds. The extended forecast is calling for a return to warm and dry temperatures by next week, which could prove a challenge to wildfire suppression efforts in areas that do not receive rain in the next few days.
