Kimberly J. Williams	Department of Biology, Eastern Michigan University, Ypsilanti, MI, USA 48197

Many people helped to organize and run the symposium and have helped to put together this volume. In particular we would like to thank Laura Friis (BC Environment, Lands and Parks) for her organizational help and for supplying various literature produced by the provincial government, Eric Lofroth (BC Environment, Lands and Parks) for financial assistance, Dave Nagorsen and the Royal British Columbia Museum for admission to the museum, Anne Brigham for her expert calligraphy and help at registration, the staff at the Clarion Hotel Grand Pacific in Victoria for providing a wonderful working environment, Carol Stefan for creating the cover illustration, Rick Page, Scott McNay, and Heather Strongitharm (Ministry of Forests) for putting together the financing and organization of this volume, and the U.S. Forest Service for greatly assisting the production of the proceedings by offering financial assistance. Finally, we would like to thank the speakers, who without exception stuck to their allotted time, made excellent and stimulating presentations, and submitted their manuscripts promptly. All the participants asked probing questions, brought diverse perspectives to the various topics, and generated very worthwhile discussion. It was also fun!
