## **WHEN ENJOYING A CAMPFIRE:**

- Find out if there are any restrictions on campfire use.
- Build your fire a reasonable distance away from any combustible materials.
- Create an adequate fuel-free area directly around your fire. Use a safe, established fire pit whenever possible.
- Have 1 hand tool or 8 litres of water on site.
- Consider the wind conditions; strong winds carry sparks.
- Never leave your fire unattended, even for a short time.
- Keep your fire small (0.5 m high x 0.5 m wide or less).
- Be sure the coals and ashes are extinguished and cold to the touch before you leave the site.
